

Diabetes Clinic

Diabetes clinics is to make sure you're as healthy as possible and to get a specialised advice on how to look after your diabetes.

Podology Clinic

The Department of Podiatry specialises in the management and treatment of disorders affecting the lower limb.

ECG Clinic

ECG measures the heart's electrical activity. This can help doctors tell how the heart is working and identify any problems.

Blood Letting

Blood letting is the withdrawal of blood from a patient to prevent or cure illness and disease.

Physiotherapy

Physiotherapists help people affected by injury, illness or disability through movement and exercise, manual therapy, education and advice.

Bathroom

5 bathrooms are located around all the healthcare Centre, they are found near the Registration Office and the waiting room.

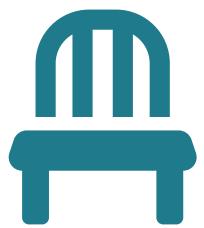

Registration Office

Here is where clients go through first if in need of an appointment. The registration office is located on the right of the main entrance

Car Park

Diabetes clinics is to make sure you're as healthy as possible and to get a specialised advice on how to look after your diabetes.

Waiting Room

In our centre there are two large waiting rooms. one is used for clients waiting for their appointment and one is for the visitors waiting for clients to finish the appointments

Cafeteria

Cafeteria is located on the left of the centre's main entrance, opposite to the registration office. Here clients and visitor can have a snack in our cafeteria
